

Metrology for Efficient and Safe Innovative Lighting

Stakeholder Committee

EMRP project **ENG62 MESaIL** “Metrology for Efficient and Safe Innovative Lighting” has successfully started on June 1st, 2014, aiming to deliver an advanced metrological framework for novel SSL to the threefold stakeholders community of:

To assure exploitation of the intended impact a **Stakeholder Committee** has been established during the First Stakeholder meeting hold in Sep 2014.

The **stakeholders** attended the First Stakeholder Meeting have been introduced into the objectives of the project and a draft document for **Terms of Reference** for stakeholder Committee has been presented.

To assure the high level of collaboration with stakeholders four **stakeholders meetings** have been planned during the project in: **autumn 2014, autumn 2015, autumn 2016** and **spring 2017**. Additionally, a training course for the stakeholders is planned in **autumn 2017**.

ENG62 MESaIL aims to speed up standardization process by its major contribution to written standards on international (CIE) and European (CEN) levels.

The project is coordinated by VSL and will be running for **3 years until May 31st, 2017**. The project consortium consists of 11 NMIs, a world-leading SSL manufacturer and two Technical Universities covering 11 countries. The total budget of the project is around 3.7 mln. €.
